## RICHMOND, VA.

EACH of her seven hills is a jewel to sparkle throughout the earth, each of her valleys a setting to command universal admiration.

Her suburbs are the finest plush that ever surrounded and beautified a beautiful ornament and she justly occupies a distinctive and enviable position in the jewelry box of nature.

---

The most attractive and interesting place in Richmond is Richmond. This the traveler will find true after visiting the Capital of the Old Dominion and feasting on the banquet of beautiful and historic places of interest and enjoying the home-like air which pervades this ancient but youthful city.

To pick out for the reader the most popular thing about Richmond is to undertake a hopeless task, for she abounds in things pleasant and interesting to a degree enjoyed by no other city in this country.

As the first half of her name implies, Richmond

is wealthy, and her wealth consists not only in financial assets but in a mint of superior advantages as a manufacturing and commercial center and a beautiful home city.

Within the last few years this metropolis of the State has made extraordinary advances along all lines. Within the last forty-three years she has accomplished a marvelous metamorphosis, which trans-

WILLIAM BYRD,  
Founder of Richmond.

forms her from a crushed, devastated and demoralized rendezvous of refugees and fanatics to one of the foremost municipalities of the United States.

The next decade will record still greater achievements, for Richmond is enjoying a rapid, steady and logical growth and improvement, the natural development of her superb resources.

In the midst of this great progressive era, the many historical features of the Capital stand out in attractive contrast and add to the general interest.

The following pages will be found to contain illustrations of all the principal points of interest in Richmond and it is the hope of the publishers that the book will prove both interesting and instructive to every reader. Never before has such a complete list of views of the Capital of the Old Dominion been published in this style.

Incidentally, for the reader's reference, the following brief data are added:

Richmond is situated about 94 miles from the Atlantic ocean; 557 miles from Boston; 345 from New York; 744 from Jacksonville, Fla.; 3,175 from San Francisco.

In 1609 Richmond was settled, within two years after the founding of the first English settlement—Jamestown. Its population now is a little over 112,000, not counting that of its suburbs, which brings the total up to about 130,000.

POWHATAN'S GRAVE
